MEMORANDUM FOR: [REDACTED]

SUBJECT:

Revision of 'Reports Control Manual' for 'M' Program

1. In response to your request the following changes are suggested in the receipt of data to best meet NPIC's needs. It should be recognized that NPIC is not fully cognizant of all aspects of the system and its operation, therefore other changes may be necessary as dictated by further knowledge and experience.

a. Remove NPIC from distribution of [REDACTED] (This data is acquired via [REDACTED] These cables are not currently being received by NPIC; however, the Reports Control Manual lists NPIC as a recipient.)

b. Include NPIC as a recipient in the distribution of [REDACTED]

c. [REDACTED] was established at NPIC's request; however, [REDACTED] requested that these data be forwarded via registered air mail or courier rather than by cable. We agree, as long as these data are received by the time the film is received at NPIC.

2. The number of copies of each cable is the same as for the 'C' Program.
